

Order Kit 3 before 30 September to receive these introductory prices

Like many teachers, the authors of the Numicon approach understand the benefits of using structured apparatus in Year 3 to improve children's understanding of the more complex maths ideas, such as algebra.

Numicon Kit 3 has been expertly crafted to support maths teaching in a way that makes lessons dynamic, enjoyable and effective. With an emphasis on problem solving, early kit 3 trials have been well received by both teachers and children.

Covering number, calculating and algebra at the New Zealand Curriculum Levels 2-3 (Stages 5-7), Numicon Kit 3 encompasses focused teaching activities; ideas for whole class, paired and individual practice, as well as suggestions for children's own recording.
