## Managing the transition to Secondary Mathematics

## Matching Numicon Big Ideas to the KS3 resources you know and love

Numicon Big Ideas is a 12-week programme for students aged 10 to 12 who would benefit from revisiting key concepts from the upper KS2 Primary Maths curriculum to help ease their transition to Secondary school.

Using the proven Numicon approach, Numicon Big Ideas reteaches these concepts, using structured imagery and apparatus to reinforce and embed the ideas and break down any misconceptions a student might have. The big ideas selected for the programme are those areas in the Primary curriculum which underpin subsequent mathematical learning.

We have correlated the sessions in Numicon Big Ideas with sections in our Key Stage 3 resources: Discovering Mathematics 1A and 1B, MyMaths for Key Stage 3 1A and 1B, and with MyMaths lessons. These links allow teachers to identify where Year 7 teaching plans combine with concepts from Numicon Big Ideas and where they can provide students with the chance to develop their knowledge of those concepts.

We hope that the combination of our resources will support new students entering Year 7 in September who have gaps or weaknesses in their upper KS2 knowledge which could be more pronounced this year because of disruptions caused by the pandemic.

You can find support to help you get started with Numicon Big Ideas at www.oxfordsecondary.co.uk/numicon.

Moreover, we have also included matching to other Numicon sessions in the matching table.

## Teaching materials featured in this resource:

Numicon: Big Ideas ISBN: 9780198417040

Numicon: Number, Pattern and Calculating 4 Teaching Pack ISBN: 9780198389842

Numicon: Geometry, Measurement and Statistics 4 Teaching Pack ISBN: 9780198389859

Numicon: Number, Pattern and Calculating 5 Teaching Pack ISBN: 9780198489719

Numicon: Geometry, Measurement and Statistics 5 Teaching Pack ISBN: 9780198489726

Discovering Mathematics, Student book 1A ISBN: 9780198421726

Discovering Mathematics, Student book 1B ISBN: 9780198421719

I	I: Becoming familiar with Numicon Shapes	<ul> <li>To become sufficiently familiar with Numicon Shapes so they can be used as a concrete manipulative in the forthcoming sessions.</li> </ul>						
	2: Getting to know number rods	<ul> <li>To be able to match number rods with numerals.</li> <li>To represent numbers using base-ten apparatus and arrow cards.</li> <li>To become familiar with using number rods for whole numbers, doubles, halves and number bonds to 20, 60 and 100.</li> </ul>						1336, 1346, 1347, 1397
	3: Base ten	<ul> <li>To use regrouping when crossing multiples of ten.</li> <li>To represent numbers using base-ten apparatus and arrow cards.</li> </ul>		Number hacks, Number Bonds to 10: p.362				1221, 1348
	4: Properties of number	<ul> <li>To introduce the term 'commutative' in context.</li> <li>To work systematically to produce number bonds of 8.</li> <li>To identify odd and even numbers and to use them in context.</li> <li>To look for patterns, predict answers and check them using manipulatives.</li> </ul>						1218, 1398
2	I: Whole numbers with four digits and zero as a place holder	<ul> <li>To visualize, describe or draw 2-, 3- and 4-digit numbers.</li> <li>To understand and explain the role of 0 as a place holder in 2-, 3- and 4-digit numbers.</li> </ul>	NPC 4, Numbers and the Number System I, Activities 3–6; Numbers and the Number System 2, Activities 3 and 4.	I.I Place Values and Order of Numbers: p.5		la Place Value: p.4		1216, 1352, 1918, 1972
	2: Ordering and comparing numbers: 4-digit and 5-digit numbers	<ul> <li>To understand the quantity and column value of digits in numbers between 1000 and 100 000.</li> <li>To recognize the place value of each digit in 5-digit numbers.</li> <li>To order and compare numbers up to 100 000.</li> </ul>	NPC 4, Numbers and the Number System 2, Activities 2 and 3. NPC 5, Numbers and the Number System I, Activities 6 and 7.	I.I Place Values and Order of Numbers: p.5				1918, 1972
	3: Counting forwards and backwards, across boundaries, using multiples of ten	<ul> <li>To order and compare numbers greater than 1000.</li> <li>To use place value for addition and subtraction (forup to 7-digit numbers).</li> <li>To recognize the place value of each digit up to 7-digit numbers (millions, hundred thousands, ten thousands, thousands, hundreds, tens and ones).</li> </ul>	NPC 4, Calculating 2, Activities I and 2. NPC 5, Numbers and the Number System I, Activities 6 and 7. Repeat for larger numbers.	I.2 Addition: p.I0				1399
	4: Rounding numbers to use in calculations	<ul> <li>To round 5-digit numbers to the nearest I0, 100, 1000, 10000, 100000.</li> <li>To compare rounded numbers with unrounded numbers.</li> <li>To check that calculations are of the correct magnitude using rounding.</li> </ul>	NPC 4, Numbers and the Number System 3, Activity 5. NPC 5, Numbers and the Number System 4, Activities 2–4.	I.4 Efficient Addition and Subtraction by Hand: p. 21, 3.1 Rounding Numbers: p.71		Ig Rounding and estimating: p.16	7a Rounding: p.126	1003, 1840, 1373, 1219
3	I: Estimating	<ul> <li>To know estimates are not exact amounts and are often given as round multiples of 10, 100 or 1000.</li> <li>To use rounding to estimate answers in calculations involving numbers with up to 4 digits.</li> <li>To estimate to check the reasonableness of an answer.</li> </ul>	NPC 4, Numbers and the Number System 3, Activity 3. NPC 5, Numbers and the Number System 4, Activities I, 7 and 8.	3.1 Rounding Numbers: p.71 3.2 Estimation: p.75				1002, 1003, 1219, 1840
	2: Column adding	<ul> <li>To add numbers with up to four digits using the formal written method of column adding.</li> <li>To estimate the answer to an adding calculation before calculating and then to check answers.</li> </ul>	NPC 4, Calculating 8, Activity 4. NPC 5, Calculating 5, Activities I–3.	I.2 Addition: p.I0		7c Written addition and subtraction I: p.134, 7d Written addition and subtraction 2: p.136	le Written methods of addition and subtraction: p.12	1020, 1399, 1901, 1902
	3: Column subtracting	<ul> <li>To subtract numbers with up to four digits using the formal written method of column subtracting.</li> <li>To estimate the answer to a subtracting calculation before calculating and then to check answers.</li> </ul>	NPC 4, Calculating 9, Activities 2–4. NPC 5, Calculating 6, Activities 2 and 3.	I.3 Subtraction: p.I5		7c Written addition and subtraction I: p.134, 7d Written addition and subtraction 2: p.136	le Written methods of addition and subtraction: p.12	1901, 1903, 1908, 1028
	4: Inverse relationships	<ul> <li>To use the inverse relationship between adding and subtracting to solve a variety of problems.</li> <li>To know that using the inverse relationships can be useful to check calculations.</li> </ul>	NPC 4, Pattern and Algebra 2, Activities I and 2; Calculating I, Activity 3. NPC 5, Calculating I, Activities I and 2.					1398

				Student book IA	Student book IB	Student book IA	Student book IB	lessons
4	I: Multiplying and dividing	<ul> <li>To recognize that multiplying and dividing are inverse operations (e.g. 10 × 5 = 50 and 50 ÷ 5 = 10).</li> <li>To recognize that multiplying is repeated adding of the same number.</li> <li>To recognize that dividing is repeated subtracting of the same number.</li> <li>To understand the role of zeros in multiplying.</li> </ul>	NPC 4, Calculating 5, Activities I and 3; Calculating 6, Activity 5. NPC 5, Calculating 4, Activity 3.	2.1 Multiplication: p.32 2.2 Division: p.45		14a Multiplication: p.258		1910, 1367, 1401, 5682
	2: Multiplying and dividing by 10, 100, 1000	<ul> <li>To multiply a single-digit number by 10, 100 or 1000.</li> <li>To divide a thousands, hundreds or tens number by 10, 100 or 1000 leaving a whole number.</li> </ul>	NPC 4, Calculating 7, Activities I–5.	2.1 Multiplication: p.32 2.2 Division: p.45 6.3 Multiplying and Dividing by 10, 100 and 1000		I4b Multiplying by I0 and I00: p.260	Ib Multiply and divide by 10, 100 and 1000: p.6	1027, 1368, 1392
	3: Multiplying: HTO × O	<ul> <li>To be able to multiply a 3-digit number by a I-digit number.</li> <li>To be able to use the long and short written methods of multiplying.</li> </ul>	NPC 4, Calculating I0, Activities 4 and 5. NPC 5, Calculating 4, Activity 5.			I4d Written methods of multiplication: p.264		1024, 1025, 1904, 1911
	4: Dividing with informal methods	<ul> <li>To reinforce the understanding that dividing is the inverse of multiplying.</li> <li>To understand that dividing is repeated subtracting (of the same number).</li> <li>To recognize that dividing results in equal parts.</li> </ul>	NPC 4, Calculating 6, Activities 3 and 4. NPC 5, Calculating 8, Activity 4.			14e Mental methods of division: p.266		1228, 1391, 1775, 5682
5	I: Unit fractions	<ul> <li>To be able to show basic fractions on a number line.</li> <li>To understand that fractions involve dividing.</li> <li>To know that in unit fractions of the type I/d as d gets bigger the fraction gets smaller.</li> </ul>	NPC 4, Numbers and the Number System 5, Activities I and 4; Calculating II, Activity 5.	5 Understanding Fractions: p.110		4a Writing fractions: p.66		1062, 1018, 1220, 1369
	2: Non-unit fractions	<ul> <li>To be able to show basic non-unit fractions on a number line.</li> <li>To understand that non-unit fractions involve dividing and multiplying.</li> <li>To know that fractions of the type n/d are n times bigger than the unit fraction I/d</li> </ul>	NPC 4, Numbers and the Number System 5, Activity 3; Calculating II, Activity 5.	5 Understanding Fractions: p.110			4a Fractions p.64	1018, 1062
	3: Fractions of amounts	<ul> <li>To be able to calculate a non-unit fraction of an amount, e.g. 4/5 of 20.</li> <li>To use a number line for tenths accurately.</li> </ul>	NPC 4, Numbers and the Number System 5, Activity 3. NPC 5, Numbers and the Number System 6, Activities I and 2.	5 Understanding Fractions: p.110		4d Fractions of an amount I: p.72	4e Fraction of a quantity: p.72	1018, 1370
	4: Equivalent fractions	<ul> <li>To recognize equivalent fractions.</li> <li>To understand that equivalent fractions have the same value.</li> <li>To be able to generate equivalent fractions.</li> <li>To recognize and use b b as the equivalent fraction convertor.</li> </ul>	NPC 4, Numbers and the Number System 5, Activity 2; Numbers and the Number System 7, Activity 4. NPC 5, Numbers and the Number System 2, Activities 5 and 7.	5.3 Equivalent Fractions p.128		4b Equivalent fractions: p.68	4b Equivalent fractions: p.66	1042, 1773, 1984, 1371
6	I: Adding and subtracting fractions (same denominator)	<ul> <li>To be able to add and subtract two (or more) fractions with the same denominator.</li> <li>To understand how denominators and numerators are manipulated in these calculations.</li> </ul>	NPC 4, Numbers and the Number System 5, Activities 3–5. NPC 5, Numbers and the Number System Calculating I, Activity 4.		5.3 Addition and Subtraction of Fractions and Mixed Numbers, p.124		4c Addition and subtraction of fractions: p.68	1017
	2: Fractions and decimal equivalents	<ul> <li>To recognize common fractions and their decimal fractions equivalents (e.g. 1/2 = 0.5, 1/4 = 0.25, 4/10 = 0.4).</li> <li>To compare and order decimal fractions (e.g. 0.1 is 10 times bigger than 0.01).</li> </ul>	NPC 4, Numbers and the Number System 6, Activities 3 and 4; Numbers and the Number System 8, Activity 3.	6.1 Decimal Plae Values: p.146, 6.2 Conversion between Fractions and Decimals: p.154			4d Decimals and fractions: p.70	1009, 1016, 1072, 1378
	3: Percentages	<ul> <li>To know that percentages are a way of expressing hundredths.</li> <li>To be able to work out simple percentages of amounts (e.g. 25% of 200, 1% of 400).</li> <li>To know the fraction equivalents of 1%, 50% and 10%.</li> <li>To understand that, e.g. 5% is half of 10% when the total amount is the same.</li> </ul>	NPC 5, Numbers and the Number System 7, Activities I and 2; Calculating II, Activities I and 2.	6.4 Introducing Percentages: p.168 6.5 Percentages of Qunatities: p.174		4f Percentages: p.76, 4g Finding percentages: p.78	4f Percentages: p.74	1029,1030, 5688
	4: Multiplying a fraction by a whole number	<ul> <li>To multiply a whole number by unit and non-unit fractions (e.g. 1/5 × 200 and 3/5 × 200).</li> <li>To represent fraction calculations on a number line.</li> </ul>	NPC 5, Calculating I4, Activities 2–4; Calculat- ing I5, Activity 5.		5.4 Multiplication of Fractions: p.128			1768
